

# 3D HOLOGRAM DISPLAY

# HOLOGRAM DISPLAY

Hologram display is a newly developed type of display technology. A series of dense LEDs on the surface of the rotor blades rotate at a very high speed and because the rotor blades can no longer be recognized in rotation with the human eye, the illusion arises of an object as a hologram floating freely in space. The Hologram display often be used at trade fairs, market promotion, shopping centers, cinemas, subways, airports, hotels, restaurants and many other high-traffic areas.

# TECHNICAL DETAILS

## XD60

size	60x60x10 cm
Net /Gross Weight	710g /2.3KG
LED quantity	168 dots*4 ( pcs ) = 672 dots
viewing angle	180°
voltage	20V / 12A
Resolution	612*612
support Video format	MP4、 AVI、 RMVB、 GIF、 JPG
Power rating	50W
Storage	16GB
Operation system	Windows、 Android、 ios
brightness	1500 cd/qm
lifespan	continuously running for more than 30000H
Installation	wall hanging, grounding, ceiling
Max displaying size	Support holographic interaction of multi-screen as PC extension to enlarging image size

# PRODUCT FEATURES

The Hologram display offers an extremely great opportunity to present your customers an unprecedented product presentation and to stay in the memory of the customers with this experience for a long time.

With an innovative, easy-to-use app, you can effortlessly upload, play, and modify 3D content on the hologram display of your choice.

## PRODUCT ADVANTAGES

Support holographic interaction  
of multi-screen as PC extension to enlarging  
image size

Automatic video source cutting and video  
synchronization without affect the overall  
display effect.

Specifications 3D creation for the hologram:

Format: .mp4 / Encoding: H.264

Background: black / free

use the full area in the video to show the  
hologram in full size. Make sure that the  
display is a circle, so the outermost corners of  
the hologram will not be visible. We  
recommend using only 3D models to ensure  
the best possible 3D effect. For this we use 3D  
animation programs like 3D Studio Max, etc

Software : laptop/app by 3D display

## ACCESSORY

1. Transparent outer cover that is acrylic cover needs to be purchased separately (optional).
2. Ground stand :needs to be purchased separately (optional).
3. Customized 3D content ( optional ) demo video will be provided for free.
